

# Dollar/Buckeye Creek Culvert Replacement

Project made possible through the Secure Rural Schools and Communities Self-Determination Act.

The goal of this project was to replace existing culverts with larger ones at the main line crossings of Dollar and Buckeye creeks in order to improve fish passage. Improving passage on these two streams helps re-establish connectivity between the Calapooia River and its tributaries. This in turn increases the survival rates of juvenile salmon and hopefully leads the species toward recovery and eventual removal from the Threatened and Endanger Species list.
